

LIFE14 ENV/IT/443

Eco friendly tanning cycle (Duration: 01/10/2015 – 30/09/2017)

OBJECTIVE:

To demonstrate alternative products and technologies for environmental improvement of the tanning process.

EXPECTED RESULTS:

- Processing of hides using products with less environmental impact:
 - Poultry manure in the bating phase
 - Metal-free tanning agents
 - Naturalized dyes and defatting agents obtained from dairy industry wastes
 - Fatliquors derived from natural oils alternative to chloroparaffins
- High quality leathers, free from restricted substances and more environmentally friendly
- Improvement of the competitiveness of EU tanneries
